Flat Roof

Allows pricing for Stillages and Larger Pack Sizes

smart
Bulk Pricing

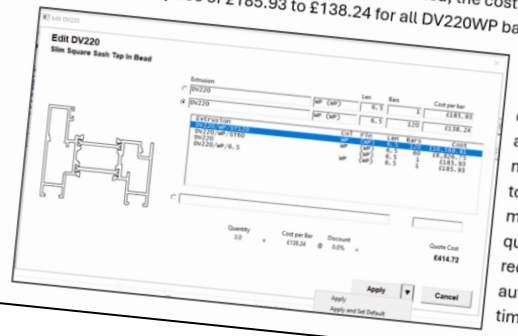

Profiles and components are available in bulk at discounted rates—for instance, ST120 refers to a stillage of 120 bars. The new Bulk Pricing screen lets you edit item costs within a quote to reflect bulk pricing.

For items which have bulk options are listed on the screen with ** in the righthand column Bulk. If a bulk size has been selected it will show in this column.

In the Edit screen below, you can change the price from the default unit in V6—listed at the top—to the other options shown in the list box below.

In the example provided DV220/WP/ST120 is selected, the cost per bar reduces from the standard V6 price of £185.93 to £138.24 for all DV220WP bars in the quote.

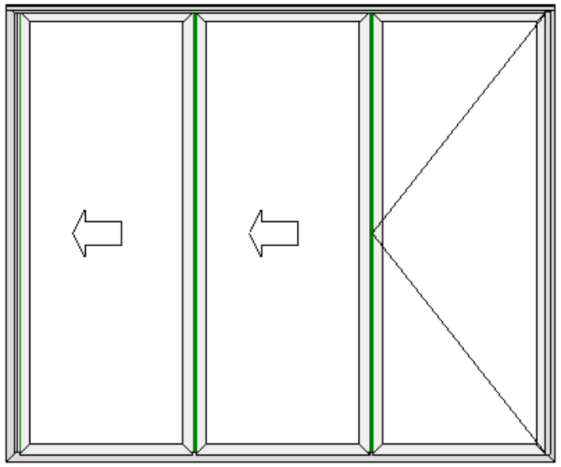

Clicking Apply to update the price for the current quote. The adjacent button gives a menu which allows this to also be set as default mapping for future quotes. As default the reduced cost will apply automatically next time.

Bulk Pricing – Purchasing Bulk

Mapping effects quote pricing report
Purchase order unit sizes remain unchanged
Currently to order bulk through online ordering portal

Future plans to updates to reports
and excel purchase order.

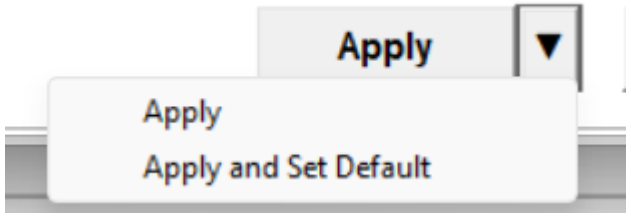

Bulk Pricing - How Applied

When bulk selected all bars in the quote will be at the bulk price.

e.g. if ST60 is selected and an order has 63 bars
all bars 63 bars will be at the reduced stillage rate

Bulk Pricing - Default

Can setup for each quote or
set as default then this will apply the
reduction automatically

Bulk Pricing – Copying Quotes

If a quote is copied then bulk pricing will reset to default mapping
